

Aurora NX™

The Next Generation of
Plasma Beauty Technology

Exceptional results. Consistent outcomes. Nova's PlasmaWave™ Technology delivers the efficiency and reliability professionals rely on, and the visible results clients expect.

INNOVATIVE PLASMA TECHNOLOGY

At the heart of every Nova device lies our proprietary **PlasmaWave™** Technology, which delivers a uniform, precise plasma flow.

This unique approach ensures consistent energy delivery, superior results, minimal discomfort, and fast recovery - redefining the standard of plasma treatments worldwide.

WHAT is PLASMA?

Plasma, the fourth state of matter, is a gas that contains some atoms or molecules with an electrical charge.

A plasma beam is composed of a mix of reactive species (like O_3 , NO , NO_2) and produces several effects at once: UV and heat radiation, an electromagnetic field, and a flow of ions and electrons.

This unique combination gives plasma superior disinfection properties while simultaneously promoting skin rejuvenation and improving oxygenation in the underlying tissue.

Plasma - the non-surgical path
to lifted, youthful, radiant skin.

FIBROBLASTING PLASMA TREATMENT

Hot Plasma energy gently evaporates excess skin and stimulates the deep dermis, enhancing the production of collagen and skin regeneration. This process naturally lifts, tightens, and firms the skin - without surgery or injections.

The treatment is quick, comfortable, and offers significantly shorter recovery time compared to traditional procedures.

DEVICE HIGHLIGHTS

- 01 Dual-Mode Plasma: Hot & Cold for a wide range of treatments.
- 02 Non-invasive and safe for all skin types.
- 03 Visible results after just one session.
- 04 Built-in treatment protocols for efficient, guided operation.
- 05 Cloud-connected system for automatic updates and upgrades.
- 06 Ergonomic, modern design for effortless daily use.

COLD PLASMA TREATMENTS

For Regeneration, Healing & Repair

- Acne, bacterial and fungus treatment
- Skin stimulation and cell renewal
- Treatment of post-acne scars
- Treatment of stretch marks
- Skin tightening and firming
- Hair loss and regrowth treatment
- Increasing the absorption of active substances in the skin
- Treatment of skin problems such as psoriasis, seborrhea, rosacea

THE POWER OF COMBINATION

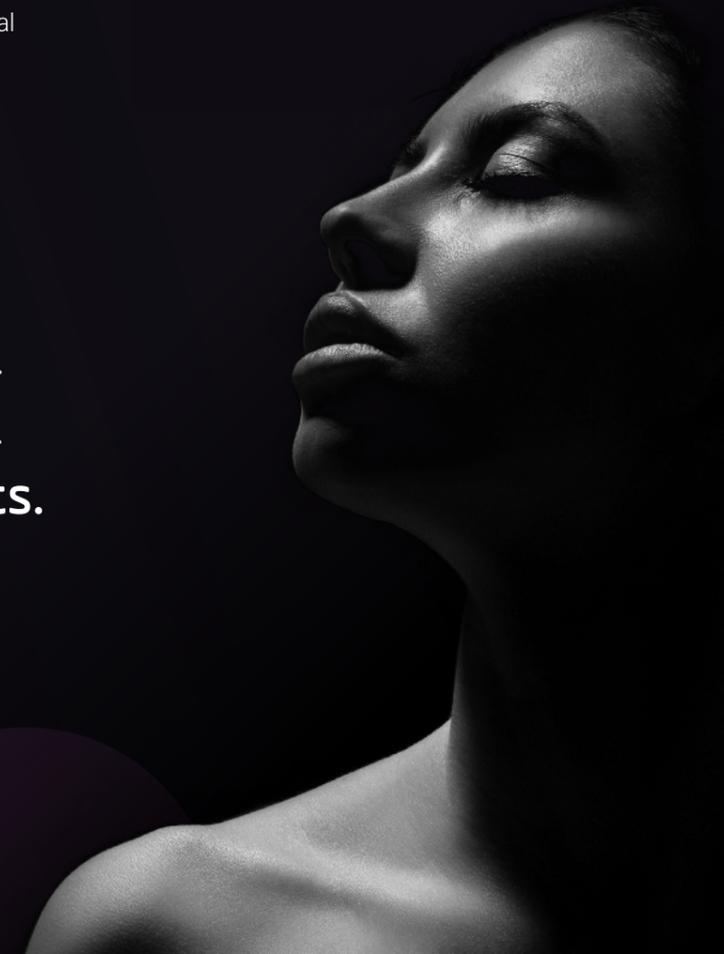

The Aurora NX allows the use of Hot and Cold Plasma in the same treatment - for unparalleled results.

Combined protocols enable full-face and neck rejuvenation in a single session with minimal downtime and no surgery.

HOT PLASMA TREATMENTS

- **Collagen stimulation**
Plasma stimulates the fibroblast cells in the skin, promoting the production of collagen and elastin.
- **Wrinkles reduction**
Plasma can help reduce the appearance of wrinkles and fine lines, particularly around the eyes, mouth, and forehead.
- **Scar reduction**
Plasma may be effective in reducing the appearance of certain types of scars, including acne scars and stretch marks.
- **Skin tightening and lifting**
Plasma treatments can be used to achieve skin tightening and lifting effects. The application of plasma can lead to the contraction of the skin, resulting in a firmer, more lifted appearance.
- **Non-surgical eyelid lift (blepharoplasty)**
Plasma is often used for non-surgical eyelid lifts. By targeting the excess skin on the eyelids, the plasma energy can help tighten the area, reducing sagging and creating a more rejuvenated appearance.

Maximum effect.
Minimal recovery.
Remarkable results.

ABOUT NOVA PLASMA

Founded in 2012, Nova Plasma Ltd. is a global innovator in plasma-based technologies for both aesthetic and medical applications.

With headquarters in Israel and distribution in multiple continents, Nova combines advanced engineering with a deep understanding of skin science.

The Aurora™ Plasma Series features advanced, intelligent plasma systems exclusively for the beauty and aesthetic industry.

Leveraging on the patented PlasmaWave™ Technology, these products are recognized and utilized by professionals worldwide, setting the standard for performance, safety, and sophisticated design.

TRAINING & EXPERTISE

Nova Plasma works in close collaboration with

Miriam Zaretski – an International Plasma Master Trainer, and one of the world's leading authorities in plasma-based aesthetics.

With over a decade of experience in Europe, the USA, and Israel, Miriam has trained hundreds of professionals to perform plasma treatments with precision, confidence, and success.

Her clinical expertise ensures every practitioner receives world-class training and ongoing support.

Gentle. Smart. Powerful.

A new era of plasma-based beauty begins with the Aurora NX - the ultimate fusion of science, safety, and aesthetics.
