

# PLASMA RESULTS YOU CAN TRUST

# THE AURORA100™

- Non-Invasive
- Quick and Effective Treatment
- Exceptional Business Opportunity

## FIBROBLASTING PLASMA TREATMENT

The Aurora™ 100 offers a non-invasive, soft surgical skin tightening treatment. Our esthetic procedure uses warm plasma energy to rejuvenate and revitalize the skin.

The treatment requires minimum downtime, ideal for busy individuals looking to rejuvenate their skin without interrupting their daily routine.

## WHAT IS PLASMA?

Plasma is made of a gas with some ionized atoms / molecules. A Plasma beam is comprised of a mix of reactive species (O3, NO, NO2).

Plasma has superior disinfection properties and at the same time improves the underneath tissue's oxygenation and skin rejuvenation.

### About Nova Plasma

Since 2012, Nova Plasma has been at the forefront of innovating and designing cutting-edge plasma devices.

## GENTLE AND SAFE APPROACH TO SKIN TREATMENT

### **Collagen Stimulation**

Plasma stimulates the fibroblast cells in the skin, promoting the production of collagen and elastin.

### **Reduced Wrinkles and Fine Lines**

Plasma can help reduce the appearance of wrinkles and fine lines, particularly around the eyes, mouth, and forehead.

### **Scar Reduction**

Plasma may be effective in reducing the appearance of certain types of scars, including acne scars and stretch marks.

### **Skin Tightening and Lifting**

Plasma treatments can be used to achieve skin tightening and lifting effects.

The application of plasma can lead to the contraction of the skin, resulting in a firmer, more lifted appearance.

### **Non-Surgical Eyelid Lift (Blepharoplasty)**

Plasma is often used for non-surgical eyelid lifts. By targeting the excess skin on the eyelids, the plasma energy can help tighten the area, reducing sagging and creating a more rejuvenated appearance.

### **Downtime and Recovery**

Compared to more invasive surgical procedures, plasma treatments generally have shorter downtime. While some redness, swelling, and small scabs may occur, these effects are temporary and usually resolve within a week or so.

## Aurora100™ – MAIN FEATURES

- Simple and easy-to-use
- Continuous plasma – reduction of chair time by up to 85%!
- Ergonomic design
- Three levels of energy intensity
- A special mode for skin lesions
- Disposable tip to ensure no cross-contamination
- Unique business opportunity – short ROI
